Table 2.3. Aggregated population profile based on data from Table 2.2.

|                                     | Bark  | Leaf lobe sinuses                        | Fruit maturation |
|-------------------------------------|-------|--|------------------|
| Species A                           |       |  |                  |
| Profile 1.1 (based on plants A & B) | tight | shallow                                  | 2 yrs            |
| Profile 2.2 (based on plants F & G) | tight | shallow                                  | 2 yrs            |
| Aggregate profile:                  | tight | shallow                                  | 2 yrs            |
| Species B                           |       |  |                  |
| Profile 1.2 (based on plants E & H) | platy | shallow OR deep                          | 1 yr             |
| Profile 2.1 (based on plants C & D) | platy | shallow OR deep                          | 1 yr             |
| Aggregate profile                   | platy | shallow OR deep<br>[no fixed characters] | 1 yr             |
